Fluid 2: now with increased range

The Fluid 2 is a high performance wing for expert and competition Speedriders and Speedflyers.

A versatile wing—for all seasons

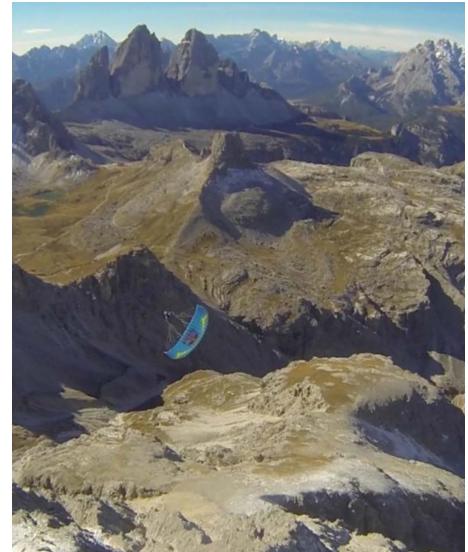

The original Fluid dominated international speedriding competition from its launch in 2009. The Fluid 2 retains this skiing heritage, but is now also suitable for advanced speedflying. The glide ratio and take-off behaviour have been significantly improved, due to developments made in many areas: the profile, line concept and internal construction. The result is that the wing's field of use is wider than ever before.

Wide speed range

The Fluid 2 has a wide speed range thanks to the advanced trim system (-2cm to +8cm). Whether diving or gliding, the Fluid 2 gives you the max!

A real swooping talent

Thanks to its precise handling, high maximum speed and high performance, the Fluid 2 is a real swooping talent. The Fluid 2 has been through a long period of development—we love the result and we're confident you will too!

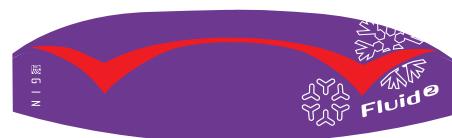

Technical specification

Size	8.5	9.5	11
Flat surface area (m ²)	8.5	9.5	11
Aspect ratio (flat)	3.8	3.8	3.8
Cell number	25	25	25
Glider weight (kg)	2.2	2.3	2.5
Pilot level	extreme expert	expert	advanced/expert
Certification	EN 926-1	EN 926-1	EN 926-1

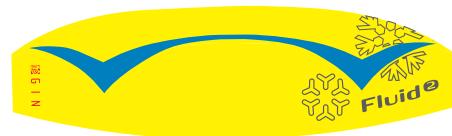

Choose your size according to your weight, skill level and intended use.
